

Final Deadline for Jenkinsville Water Connections

August 6, 2026

The Town of Queensbury has set a final deadline of Friday, August 21, 2026, for property owners in the Jenkinsville community to provide signed easements if they wish to have their home connected to new municipal water services at no charge. The deadline is necessary so that potential contractors have the information they need to submit bids on the installation phase.

Property owners who sign up for service after August 21 will be responsible for paying for the installation on their own.

The Jenkinsville community water project is divided into two zones. In Zone 1, thus far, owners of 66 of 75 properties have signed up for public water. In Zone 2, owners of 36 of 72 have signed up.

Zone 1 generally encompasses areas of Jenkinsville where New York State tests showed possible contamination in some private drinking water wells. Owners of properties in Zone 1 are required to connect to public water. Property owners in Zone 2 would have the opportunity to connect to municipal water but not be required to do so.

Property owners who wish to sign up for public water service should contact Kristy Miller at (518) 792-3856, or at kristy.miller@behancom.com.

Installation of new water mains began July 14, 2026, the first phase of a two-phase project. In the second phase, homes will be connected to the mains.
